

Support Engineer – Job Description

Position Details

Job Title: Support Engineer

Company: iCloudEMS

Location: Remote

Employment Type: Full-Time

Experience: Freshers / 0–1 Year

Work Location: Remote

About iCloudEMS

iCloudEMS is an Education ERP platform that helps universities, colleges, and educational institutions manage their academic and administrative operations through integrated digital solutions.

We are looking for a motivated **Support Engineer** to join our team and assist clients in using the iCloudEMS Education ERP platform. The ideal candidate should have a basic understanding of SQL/MySQL, web applications, troubleshooting, and good communication skills.

The role involves working closely with the **Support, Implementation, QA, and Development teams** to resolve customer issues and ensure the smooth functioning of ERP modules.

Key Responsibilities

- Provide first-level technical support to clients through phone, email, and ticketing systems.
- Understand, troubleshoot, and resolve issues related to ERP modules, including:
 - Admissions
 - Academics
 - Finance
 - HRMS
 - LMS
 - Online Examination
- Log, track, monitor, and follow up on customer issues until resolution.
- Analyze technical issues and escalate complex problems to the Development or relevant technical team.
- Perform basic SQL queries for data validation, troubleshooting, and issue analysis.
- Assist in testing software functionality and verifying bug fixes.
- Reproduce reported issues and provide clear technical information to the Development/QA teams.
- Create and maintain support documentation, user guides, FAQs, and knowledge-base articles.
- Assist with client onboarding, product demonstrations, and user training.
- Coordinate with internal teams to ensure timely resolution of customer issues.
- Maintain proper communication with clients and ensure a high level of customer satisfaction.
- Learn and understand new ERP features, workflows, and business processes.

Required Qualifications

- Bachelor's degree (Pursuing or Completed) in:
 - Computer Science
 - Information Technology
 - BCA
 - MCA
 - B.Tech
 - or a related field.
- Freshers and candidates with **0-1 year of experience** are encouraged to apply.

Required Skills

- Basic knowledge of **SQL/MySQL and relational databases**.
- Understanding of web applications and software troubleshooting.
- Basic knowledge of database concepts.
- Good analytical and problem-solving skills.
- Strong verbal and written communication skills.
- Ability to understand technical issues and explain solutions clearly.
- Willingness to learn new technologies and ERP business processes.
- Ability to work effectively with Support, QA, Implementation, and Development teams.

Preferred Skills

- Basic knowledge of **PHP**.
- Familiarity with **HTML, CSS, and JavaScript**.
- Knowledge of ERP or enterprise software applications.
- Experience with ticketing/helpdesk systems.
- Basic understanding of APIs and web services will be an added advantage.

Experience Requirements

- **Experience:** Freshers / 0-1 Year
- **MySQL:** 1 year preferred
- **PHP:** 1 year preferred

What You'll Gain

- Hands-on experience with a leading Education ERP platform.
- Exposure to real-world enterprise software support.
- Experience working with clients and educational institutions.
- Practical knowledge of SQL, databases, web applications, and ERP workflows.
- Opportunity to collaborate with Development, QA, Implementation, and Support teams.
- Career growth and learning opportunities.
- Opportunity for long-term career development within the organization.

Benefits

- Full-Time Employment
- Work From Home
- Professional learning and development opportunities
- Exposure to enterprise-level Education ERP solutions
- Collaborative work environment
- Career growth opportunities
